

Education

Motilal Nehru National Institute of Technology, Prayagraj	2022–2026
Bachelor of Technology in Electronics and Communication Engineering	Prayagraj, Uttar Pradesh
Kendriya Vidyalaya AFS, Darbhanga	2022
CBSE Class XII — 89.8%	Darbhanga,Bihar
Kendriya Vidyalaya AFS, Darbhanga	2020
CBSE Class X — 89%	Darbhanga,Bihar

Projects

Wanderloft	April 2025
Tools/Technologies: HTML,CSS ,Bootstrap, Node.js , Express.js, Passport.js, MongoDB	GitHub — Live Demo
- Developed a travel discovery & Experience-Sharing Platform with 30+ stays and destinations listings , enabling users to share travel moments, upload images, save favorites, and explore interactive map-based location previews - Implemented Passport.js authentication, session-based authorization, and owner-protected listing CRUD, enabling users to securely create, edit, and delete their own listings.. - Added destination discovery through title/location search and price/category filters (mountains, beaches, camping),with favorites, reviews, and ratings for user interaction. - Designed Wander Moments for sharing 20+ travel experiences and images through lightweight community posts.	
RAG Docbot	May 2026
Tools/Technologies : Next.js, Groq API,PostgreSQL (Neon), Clerk Authentication	GitHub — Live Demo
- Built a RAG-based document QA system that retrieves relevant content from uploaded PDFs and generates context-aware answers using LLMs. - Created a document pipeline for PDF parsing, chunking, embedding generation, and vector indexing, supporting documents with 100+ pages.. - Leveraged Google Gemini Embeddings and PostgreSQL-based vector search for semantic retrieval of relevant document context before response generation.. - Enabled secure authentication and session management using Clerk while powering real-time AI interactions with Next.js, TypeScript, Neon PostgreSQL, and Groq API. .	
AI Customer Support Agent	Ongoing
Tools/Technologies: React, FastAPI, Python, Groq API, TF-IDF	
- Architected an LLM-powered customer support system leveraging tool calling to intelligently route user queries across FAQ retrieval, order tracking, refund management, product search, and human-agent escalation. - Integrated a retrieval-based knowledge engine using TF-IDF and cosine similarity over a knowledge base and integrated seeded customer, order, product, and refund records to deliver accurate responses. - a responsive React interface with real-time chat, conversation memory, and dynamic rendering of order, refund, product, and FAQ responses..	

Technical Skills

Languages: Python, C++ , JavaScript, SQL
Frameworks/Libraries: HTML, CSS, React.js, Bootstrap ,Node.js, Express.js
Tools/Databases: MYSQL, MongoDB, Git, GitHub, VS Code, Postman
Core Subjects/Areas of interest:: Operating Systems, DBMS, OOP, Web Development, AI & ML

Achievements & Certifications

- Oracle Agentic AI Certified Foundations Associate 2026 [Link](#)
- Core Computer Science Subjects for Interview Preparation [GFG 2026 Link](#)
- Selected among top 80+ participants in the offline round of CSS Battle at Avishkar, a technical fest, 2024
- Solved 800+ Data Structures & Algorithms problems across LeetCode, CodeChef, and GeeksforGeeks
- Coding Profiles: [LeetCode](#) [CodeChef](#) [GeeksforGeeks](#)
